

Content Management

Total Content Management, Total Project Value

Your construction project requires dozens – maybe even hundreds – of documents. During the course of your project, these documents may go through hundreds – or even thousands – of changes.

Management of these documents and the associated changes can cost you time, stress and money. *Studies show that ineffective management of project changes wastes as much as 30 percent of the total cost of the project. Better management of your project's documents results in fewer errors and reduced costs.

*U.S. Department of Commerce, Technology Administration, National Institute of Standards and Technology (NIST). Aug 2004. "Cost Analysis of Inadequate Interoperability in the U.S. Capital Facilities Industry" (NIST GCR 04-867). p 3-3.

In the Hands of Experts

PRI has managed the construction content management needs for hundreds of clients over the past three decades. We maintain all your project-related documents and make it easy for you, your partners, your clients and sub-contractors to access, view and print the documents they need.

Our dedicated content management team ensures changes are on line. Our experience with the construction industry enables us to ensure the highest quality and catch potential errors before they turn into problems.

We make it easy for everyone involved in the project to review documents on line and request prints in whatever format and size desired to help the project move forward rapidly and accurately. Password access makes it possible to restrict or enable sub-contractors access to various documents based on the needs you specify. We track changes of each document, providing a clear path of change orders and project history.

Partners in Success

Our goal is for your construction project to move forward with accuracy and efficiency. Use our expertise in content management to allow you to focus on your areas of expertise in managing the project to completion.

Contact PRI today to discuss your specific content management needs.
